Comments: (If possible, please reference section and/or page number in document if applicable.)

The importance of a thorough study
of the yucca mtn site was demonstrated
during your town.

I feel the area is naturally suited
for the repository because of its proximity
to the Nevada Test Site. We should study
the area, and if found suitable by scientific
study - we should seek mitigation to
Nevada and its people, its transportation and
infrastructure needs.

I don't feel the feelings and knowledge
of the project have been relayed by
our elected officials at the State
Or National Level

Lincoln City, Nevada, USA
